FIRE TV, WITH ROOM TO BREATHE

Calm Home.

A quieter home screen. Your apps, beautifully within reach.

01 / The home screen: full-screen brand artwork and a six-app dock.

01

A clean first impression

Large artwork, a discreet clock and familiar app logos. No labels competing beneath the icons.

02

Made for the remote

Clear white focus outlines and a gentle lift make the selected app easy to see from the sofa.

03

Your everyday favourites

Keep your most-used apps in the dock. Move down to reveal the rest of your visible app grid.

16:9 app tiles

Consistent shapes with the installed apps' own branding.

A black app grid

Artwork steps aside when you browse below the dock.

Quick access

Dedicated tiles for TV settings and the Fire OS home screen.

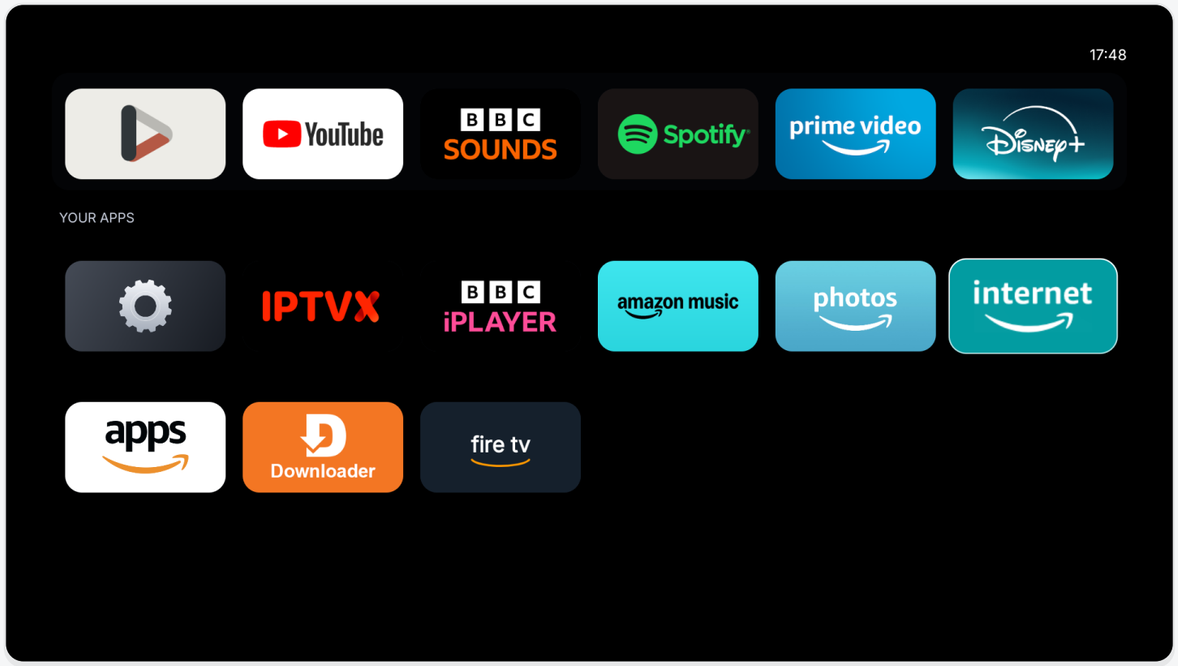

FAMILIAR TO USE. PERSONAL TO YOU.

Everything in its place.

Explore content, arrange your apps and keep the screen focused on what matters.

02 / Frame shares film artwork, title and running time with Top Shelf.

03 / The lower grid: installed apps, Settings and the Fire OS shortcut.

Explore from Top Shelf

Browse shared films with the remote. Select opens the film's detail page in its source app; Play/Pause can start playback.

Favourites above the dock

Compatible apps can share saved stations and artwork as larger 16:9 previews on black. Sounds Like still needs to connect its feed.

Move it. Hide it. Bring it back.

Long press an app for Move or Remove from Calm Home. Rearrange with the arrows, or hide a tile without uninstalling the app. Restore it from Menu.

Built for everyday use

App order and hidden choices are saved. Settings opens the TV's native controls; the Fire OS tile provides a deliberate route back to Amazon Home.

117 device checks passed

Navigation, app order, hide/restore, favourites, artwork, Settings and Fire OS escape.
